- Announces second-quarter reported earnings of \$0.60 per share and earnings from ongoing operations of \$0.58 per share.
- Reaffirms 2019 earnings from ongoing operations forecast range of \$2.30 to \$2.50 per share.

ALLENTOWN, Pa., Aug. 6, 2019 /PRNewswire/ -- PPL Corporation (NYSE: PPL) on Tuesday (8/6) announced second-quarter 2019 reported earnings (GAAP) of \$441 million, or \$0.60 per share, compared with second-quarter 2018 reported earnings of \$515 million, or \$0.73 per share.

Reported earnings for the first six months of 2019 were \$907 million, or \$1.24 per share, a decrease from \$967 million, or \$1.38 per share, for the first six months of 2018.

Adjusting for special items, second-quarter 2019 earnings from ongoing operations (non-GAAP) were \$422 million, or \$0.58 per share, compared to \$384 million, or \$0.55 per share, a year ago.

Earnings from ongoing operations for the first six months of 2019 were \$930 million, or \$1.27 per share, compared to \$901 million, or \$1.29 per share, a year ago.

"Our regulated utilities continued to deliver strong operational performance in the second quarter, making planned investments to strengthen grid resiliency, delivering electricity and natural gas reliably, facilitating distributed energy resources, and once again earning recognition for industry-leading customer satisfaction in the regions we serve," said William H. Spence, PPL's chairman and chief executive officer.

"Following our second-quarter performance, we remain confident in our ability to deliver on our 2019 earnings forecast," Spence said.

PPL's forecast range for earnings from ongoing operations, reaffirmed today, is \$2.30 to \$2.50 per share, with a midpoint of \$2.40 per share.

The company also reaffirmed its expectation of 5 to 6 percent compound annual earnings growth per share through 2020 based on its original 2018 earnings forecast midpoint of \$2.30 per share. In addition, PPL maintained its 2021 earnings forecast range of \$2.50 to \$2.80 per share. The company indicated that recent independent forecasts of British pound sterling to U.S. dollar exchange rates remain within the range of assumptions used for the company's earnings projections and that it will continue to monitor fluctuations in the currency exchange rates for potential impacts to its earnings projections given the current political environment in the U.K.

Earnings from ongoing operations is a non-GAAP measure that could differ from reported earnings due to special items that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations. PPL management is not able to forecast whether any of these factors will occur or whether any amounts will be reported for future periods. Therefore, PPL is not able to provide an equivalent GAAP measure for earnings guidance.

Reflecting special items recorded through the second quarter, estimated 2019 reported earnings per share would be \$2.27 to \$2.47 per share. See the table at the end of this news release for a complete reconciliation of PPL's earnings forecast.

PPL projects comparable earnings per share in 2019 compared to last year due primarily to \$0.13 of share dilution and an assumed return to normal weather. Absent these factors, PPL believes earnings per share would be higher in 2019. The expected dilution in 2019 is primarily due to the projected settlement of the remaining 43.25 million shares of common stock under two forward sale agreements completed in May 2018 to address the impacts of U.S. tax reform.

Headquartered in Allentown, Pa., PPL Corporation (NYSE: PPL) is one of the largest companies in the U.S. utility sector. Management utilizes "Earnings from Ongoing Operations" as a non-GAAP financial measure that should not be considered as an alternative to reported earnings, or net income, an indicator of operating performance determined in accordance with GAAP. PPL believes that Earnings from Ongoing Operations is useful and meaningful to investors because it provides management's view of PPL's earnings performance as another criterion in making investment decisions. In addition,

PPL's management uses Earnings from Ongoing Operations in measuring achievement of certain corporate performance goals, including targets for certain executive incentive compensation. Other companies may use different measures to present financial performance.

Earnings from Ongoing Operations is adjusted for the impact of special items. Special items are presented in the financial tables on an after-tax basis with the related income taxes on special items separately disclosed. Income taxes on special items, when applicable, are calculated based on the effective tax rate of the entity where the activity is recorded. Special items may include items such as:

- Unrealized gains or losses on foreign currency economic hedges (as discussed below).
- Gains and losses on sales of assets not in the ordinary course of business.
- Impairment charges.
- Significant workforce reduction and other restructuring effects.
- Acquisition and divestiture-related adjustments.
- Other charges or credits that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations.

Unrealized gains or losses on foreign currency economic hedges include the changes in fair value of foreign currency contracts used to hedge British-pound-sterling-denominated anticipated earnings. The changes in fair value of these contracts are recognized immediately within GAAP earnings. Management believes that excluding these amounts from Earnings from Ongoing Operations until settlement of the contracts provides a better matching of the financial impacts of those contracts with the economic value of PPL's underlying hedged earnings.

The following are among the important factors that could cause actual results to differ materially from the forward-looking statements: market demand for energy in our U.S. service territories; weather conditions affecting customer energy usage and operating costs; the effect of any business or industry restructuring; the profitability and liquidity of PPL Corporation and its subsidiaries; new accounting requirements or new interpretations or applications of existing requirements; operating performance of our facilities; the length of scheduled and unscheduled outages at our generating plants; environmental conditions and requirements and the related costs of compliance; system conditions and operating costs; development of new projects, markets and technologies; performance of new ventures; asset or business acquisitions and dispositions; any impact of severe weather on our business; receipt of necessary government permits, approvals, rate relief and regulatory cost recovery; capital market conditions and decisions regarding capital structure; the impact of state, federal or foreign investigations applicable to PPL Corporation and its subsidiaries; the outcome of litigation against PPL Corporation and its subsidiaries; stock price performance; the market prices of equity securities and the impact on pension income and resultant cash funding requirements for defined benefit pension plans; the securities and credit ratings of PPL Corporation and its subsidiaries; political, regulatory or economic conditions in states, regions or countries where PPL Corporation or its subsidiaries conduct business, including any potential effects of threatened or actual cyberattack, terrorism, or war or other hostilities; British pound sterling to U.S. dollar exchange rates; new state, federal or foreign legislation, including new tax legislation; and the commitments and liabilities of PPL Corporation and its subsidiaries. Any such forward-looking statements should be considered in light of such important factors and in conjunction with factors and other matters discussed in PPL Corporation's Form 10-K and other reports on file with the Securities and Exchange Commission.
