

PPL Corporation joins Energy Impact Partners' \$1 billion fund to accelerate global decarbonization

ALLENTOWN, Pa., Nov. 11, 2021 /PRNewswire/ -- PPL Corporation (NYSE: PPL) announced today that it has joined Energy Impact Partners, a global venture capital platform leading the transition to a sustainable future, in their Flagship Fund, Fund II. The fund received \$1 billion in commitments and will focus on investing in venture and growth companies advancing critical climate solutions.

PPL's participation in Fund II is part of the company's commitment to invest up to \$50 million across EIP's platform to accelerate the shift to a low-carbon future and drive commercial-scale solutions needed to deliver deep, economywide decarbonization.

Through Fund II, PPL will work with EIP to identify cutting-edge technologies that advance the zero-carbon economy. This includes companies innovating across supply decarbonization, electrification, tech-enabled infrastructure, reliability and resilience, and intelligent demand.

"Innovation is key to our goal of achieving net-zero carbon emissions by 2050 while keeping energy reliable and affordable for our customers and the communities we serve," said PPL President and Chief Executive Officer Vincent Sorgi. "That's why we're partnering with EIP to support entrepreneurs, and it's why we're investing more than ever before to fuel research and development of breakthrough clean energy technologies."

Sorgi said PPL's collaboration with EIP builds on the company's growing culture of innovation and will provide greater visibility into emerging technologies that can be leveraged to advance a cleaner energy future. Fund II has already made significant investments in more than a dozen promising technology companies that are critical to accelerating the energy transition.

"We are thrilled to work with PPL as part of our largest coalition of utilities and industrials focused on creating a sustainable future," said Hans Kobler, founder and managing partner of EIP. "Tackling climate change is a major challenge and opportunity that can only be solved by working together. Our unique engagement model helps our partners innovate, drives growth in our investments, and as a result, maximizes real near-term impact on the climate."

Earlier this summer, PPL announced its participation in another EIP fund, the Elevate Future Fund, which focuses on enhancing diversity, equity and inclusion by expanding opportunities for underrepresented entrepreneurs and communities in the energy transition.
