PPL Electric Utilities earns 2022 ENERGY STAR® Partner of the Year Award

Pennsylvania Utility earns highest level of EPA recognition for second consecutive year

ALLENTOWN, Pa. (May 20, 2022) – PPL Electric Utilities is proud to announce it has received the 2022 ENERGY STAR Partner of the Year Award from the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Energy. This marks the second consecutive year in which PPL Electric has earned this highest level of EPA recognition.

To be considered, ENERGY STAR partners must perform at a superior level of energy management as well as demonstrate best practices, prove organization-wide energy savings, and participate actively and communicate the benefits of energy efficiency and the ENERGY STAR program. In 2021, PPL Electric's residential energy efficiency programs facilitated impressive customer savings of more than 23,500 megawatt-hours – equivalent to the energy used by more than 2,098 homes.

“We’re proud to partner with ENERGY STAR and accept this honor for the second year in a row,” said PPL Electric Utilities Vice President of Customer Services Lisa Norden. “It’s an honor to be recognized for our commitment to helping customers save energy. Through this partnership, we’ve been able to help our customers make smarter energy choices every day, and those choices benefit the environment as well.”

Each year, the ENERGY STAR program honors a group of businesses and organizations that have made outstanding contributions to protecting the environment through superior energy achievements. ENERGY STAR award winners lead their industries in the production, sale, and adoption of energy-efficient products, homes, buildings, services, and strategies. These efforts are essential to fighting the climate crisis and protecting public health.

“We know it’s going to take all of us working together to tackle the climate crisis, and the 2022 ENERGY STAR award-winning partners are demonstrating what it takes to build a more sustainable future,” said EPA Administrator Michael S. Regan. “These companies are showing once again that taking action in support of a clean energy economy can be good not only for the environment, but also for business and customers.”

Winners are selected from a network of thousands of ENERGY STAR partners. For a complete list of 2022 winners and more information about ENERGY STAR’s awards program, visit energystar.gov/awardwinners.

ENERGY STAR® is the government-backed symbol for energy efficiency, providing simple, credible, and unbiased information that consumers and businesses rely on to make well-informed decisions. Thousands of industrial, commercial, utility, state, and local organizations — including more than 40 percent of the Fortune 500® — rely on their partnership with the U.S. Environmental Protection Agency to deliver cost-saving energy efficiency solutions. Since 1992, ENERGY STAR and its partners helped American families and businesses avoid more than $500 billion in energy costs and achieve more than 4 billion metric tons of greenhouse gas reductions. More background information about ENERGY STAR's impacts can be found at energystar.gov/impacts and state-level information can be found at energystar.gov/statefacts.
