ALLENTOWN, Pa., Nov. 5, 2019 /PRNewswire/ -- PPL Corporation (NYSE: PPL) on Tuesday (11/5) announced third-quarter 2019 reported earnings (GAAP) of \$475 million, or \$0.65 per share, an increase from third-quarter 2018 reported earnings of \$445 million, or \$0.62 per share.

Reported earnings for the first nine months of 2019 were \$1.38 billion, or \$1.89 per share, a decrease from \$1.41 billion, or \$2.01 per share, for the first nine months of 2018.

Adjusting for special items, third-quarter 2019 earnings from ongoing operations (non-GAAP) were \$445 million, or \$0.61 per share, compared to \$422 million, or \$0.59 per share, a year ago, a per-share increase of about 3%.

Earnings from ongoing operations for the first nine months of 2019 were \$1.38 billion, or \$1.88 per share, roughly even compared to \$1.32 billion, or \$1.88 per share for the first nine months of 2018.

"PPL achieved solid third-quarter financial results and continues to deliver strong operational performance across its regulated utilities," said William H. Spence, PPL's chairman and chief executive officer. "Based on our strong financial performance year-to-date, we have narrowed our 2019 earnings guidance to \$2.35 to \$2.45 per share, with the midpoint remaining at \$2.40 per share."

PPL's prior forecast range for earnings from ongoing operations was \$2.30 to \$2.50 per share.

"Across our business, we continue to modernize and reshape the grid, investing in infrastructure improvements that will strengthen grid resilience, enable the transition to a cleaner energy future and improve service to our customers," said Spence.

"In the third quarter, we neared completion of a multi-year, approximately \$470 million advanced meter replacement project on time and on budget in Pennsylvania. In Kentucky, we deployed additional advanced distribution system control technology and completed construction of a new community solar project. And in the U.K., Western Power Distribution continued to firmly position itself for an expanded role as a distribution system operator."

Looking ahead, the company reaffirmed its expectation of 5% to 6% compound annual earnings growth per share through 2020 based on its original 2018 earnings forecast midpoint of \$2.30 per share. In addition, PPL maintained its 2021 earnings forecast range of \$2.50 to \$2.80 per share. The company indicated that it will continue to monitor macroeconomic factors, including Brexit developments and fluctuations in the currency exchange rates, as it evaluates potential impacts to its earnings projections.

Earnings from ongoing operations is a non-GAAP measure that could differ from reported earnings due to special items that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations. PPL management is not able to forecast whether any of these factors will occur or whether any amounts will be reported for future periods. Therefore, PPL is not able to provide an equivalent GAAP measure for earnings guidance.

Reflecting special items recorded through the third quarter, estimated 2019 reported earnings per share would be \$2.36 to \$2.46 per share. See the table at the end of this news release for a complete reconciliation of PPL's earnings forecast.

PPL projects comparable earnings per share in 2019 compared to last year due primarily to \$0.10 of share dilution and an assumed return to normal weather. Absent these factors, PPL believes earnings per share would be higher in 2019. The dilution in 2019 is primarily due to the projected settlement of the remaining 43.25 million shares of common stock under two forward sale agreements completed in May 2018 to address the impacts of U.S. tax reform.

Management utilizes "Earnings from Ongoing Operations" as a non-GAAP financial measure that should not be considered as an alternative to reported earnings, or net income, an indicator of operating performance determined in accordance with GAAP. PPL believes that Earnings from Ongoing Operations is useful and meaningful to investors because it provides management's view of PPL's earnings performance as another criterion in making investment decisions. In addition, PPL's management uses Earnings from Ongoing Operations in measuring achievement of certain corporate performance goals, including targets for certain executive incentive compensation. Other companies may use different measures to present financial performance.

Earnings from Ongoing Operations is adjusted for the impact of special items. Special items are presented in the financial tables on an after-tax basis with the related income taxes on special items separately disclosed. Income taxes on special items, when applicable, are calculated based on the effective tax rate of the entity where the activity is recorded. Special items may include items such as:

- *Unrealized gains or losses on foreign currency economic hedges (as discussed below).*
- *Gains and losses on sales of assets not in the ordinary course of business.*
- *Impairment charges.*
- *Significant workforce reduction and other restructuring effects.*
- *Acquisition and divestiture-related adjustments.*
- *Other charges or credits that are, in management's view, non-recurring or otherwise not reflective of the company's ongoing operations.*

Unrealized gains or losses on foreign currency economic hedges include the changes in fair value of foreign currency contracts used to hedge British-pound-sterling-denominated anticipated earnings. The changes in fair value of these contracts are recognized immediately within GAAP earnings. Management believes that excluding these amounts from Earnings from Ongoing Operations until settlement of the contracts provides a better matching of the financial impacts of those contracts with the economic value of PPL's underlying hedged earnings.
